PROFILE

B.Tech Computer Science student with a strong interest in software development, web technologies, and UI/UX design. Passionate about building clean, user-focused digital experiences and continuously growing through hands-on projects.

PROJECTS

AI-Powered Agricultural Surveillance Drone | Python, TensorFlow, OpenCV, CNN, Computer Vision

subashpraveen.com/projects/ai-powered-agricultural-surveillance-drone

Built an AI agricultural drone using CNN image processing, thermal camera, and GPS to monitor crops, detect plant diseases, and assist in precision pesticide applications.

ALGO-VISUALIZER | Next.js, TypeScript, Shadcn UI, Vercel

subashpraveen.com/projects/algo-visualizer

Developed a sorting algorithm visualizer with smooth animations, adjustable speed, swap/comparison counters, and custom input support. This project deepened my understanding of TypeScript, Next.js, and deployment with Vercel.

Diagonalisation Of Matrix | HTML, CSS, JavaScript

subashpraveen.com/projects/diagonalisation-of-matrix

Created an interactive tool to diagonalize 2x2 and 3x3 matrices using eigenvalues and eigenvectors, with real-time results powered by Math.js. This project strengthened my skills in JavaScript, matrix algebra, and DOM manipulation.

CAR.IO | HTML, CSS

subashpraveen.com/projects/car-io

Built a car rental website for *Frontend Fusion Fest 2024*, showcasing clean UI design and form handling. Deployed using GitHub Pages, the project focused on practicing frontend fundamentals with HTML and CSS.
